PWS ID. # 1160018

Name of Customer: _____ Account #: _____
 Location of Service: _____ in _____, Texas _____

I _____, upon inspection of the private plumbing facilities connected to the aforementioned public water supply do hereby certify that, to the best of my knowledge:

	Compliance	Non-Compliance
(1) No direct connection between the public drinking water supply and a potential source of contamination exists. Potential sources of contamination are isolated from the public water system by an air gap or an appropriate backflow prevention assembly in accordance with state plumbing regulations. Additionally, all pressure relief valves and thermal expansion devices are in compliance with state plumbing codes.	_____	_____
(2) No cross-connection between the public drinking water supply and a private water system exists. Where an actual air gap is not maintained between the public water supply and a private water supply, an approved reduced pressure-zone backflow prevention assembly is properly installed and a service agreement exists for annual inspection and testing by a certified backflow prevention device tester.	_____	_____
(3) No connection exists which would allow the return of water used for condensing, cooling or industrial processes back to the public water supply.	_____	_____
(4) No pipe or pipe fitting which contains more than 8.0% lead exists in private plumbing facilities installed on or after July 1, 1988.	_____	_____
(5) No solder or flux which contains more than 0.2% lead exists in private plumbing facilities installed on or after July 1, 1988.	_____	_____
(6) No plumbing fixture is installed which is not in compliance with a State Approved plumbing code.	_____	_____

Water service shall not be provided or restored to the private plumbing facilities until the above conditions are determined to be in compliance.

I further certify that the following materials were used in the installation of the plumbing facilities:

Service Lines Lead _____ Copper _____ PVC _____ Other _____
 Solder Lead _____ Lead Free _____ Solvent Weld _____ Other _____

_____ **I hereby verify that a manufactured home or a mobile home will be placed at this location.**

_____ **I hereby verify this water service will not be used at this time in residential or commercial construction. If construction occurs in the future I understand I am required to furnish a properly executed form to Cash SUD.**

I recognize that this document shall become a permanent record of Cash Special Utility District and that I am legally responsible for the validity of the information I have provided.

NOTICE TO CUSTOMERS

Cash Special Utility District, hereby notifies all customers that all water utilities in the State of Texas must comply with the rules and regulations of the Texas Commission on Environmental Quality (TCEQ) concerning construction, renovation or modifications of private plumbing facilities.

Pursuant with Chapter 290 of the Texas Water Code, effective January 1, 1996, a Customer Service Inspection Certification shall be completed prior to providing continuous water service to a new construction, on any existing service when the water purveyor has reason to believe that cross-connection or other unacceptable plumbing exist or after any material improvement, correction, or addition to the private plumbing facilities.

Individuals with the following credentials shall be recognized as capable of conducting a customer service inspection certification:

- Plumbing Inspectors and Water Supply Protection Specialists licensed by the Texas State Board of Plumbing Examiners
- Certified Waterworks Operators and members of other water related professional groups who have completed a training course, passed an examination administered by the commission or its designated agent, and hold an endorsement granted by the commission or its designated agent.

Customer service inspections shall certify the following:

- No direct connection between the public drinking water supply and a potential source of contamination exists.
- Potential sources of contamination are isolated from the public water system by an air gap or an appropriate back flow prevention assembly in accordance with state plumbing regulations. Additionally, all pressure relief valves and thermal expansion devices are in compliance with state plumbing codes.
- No cross-connection between the public drinking water supply and a private water system exists. Where an actual air gap is not maintained between the public water supply and a private water supply, an approved reduced pressure-zone back-flow prevention assembly is properly installed and a service agreement exists for annual inspection and testing by a certified backflow prevention device tester.
- No connection exists which would allow the return of water used for condensing, cooling or industrial processes back to the public water supply.
- No pipe or pipe fitting which contains more that 8.0% lead exists in private plumbing facilities installed on or after July 1st 1998
- No solder or flux which contains more than 0.2% lead exists in private plumbing facilities installed on or after July 1st, 1998.
- No plumbing fixture is installed which is not in compliance with a state approved plumbing code.

The copy of the attached Customer Service Inspection Form must be properly completed and returned to the Cash Special Utility District office located at 172 FM 1564 E. Greenville, Texas 75402. The customer's water service cannot be considered a permanent service until the form has been returned to our office and made a permanent part of the customers file. Each customer is legally responsible for the validity of the information provided.
